RECEIVED

To Whom it May Concern:

I am an APS customer, who lives in Sedona, AZ. I am disturbed at the fact that APS is being allowed to install these meters, when there are so many questions about the health risks, fire hazards, as well as privacy matters. I have opted out, but feel that this issue is not about only me, or only one customer. There is already too much electromagnetic radiation in our environment. It is becoming an epidemic. And none of us know the health risks that may be an issue down the line. I personally do not have a smartphone, and limit my exposure even to the computer. These meters are a form of pollution, and should not be allowed. I know the Sedona City Council as a whole did not want these meters, but APS has been allowed to slip them in. Many people don't know the issues with them and therefore allow them, which affects not only them, but the environment.

If there are health risks with this kind of electromagnetic radiation for anyone, these meters should not be allowed to be installed, period.

I am sending this concern to you, at the Utilities Division, to look at these issues very carefully. It is time to make our cities and towns the best they can be for the people to thrive, not the corporations at the cost of the people. This is not only a health, civil liberties, and environmental issue. It has to do with making Arizona, and America, a safe place for everyone, and giving the people a voice and information and choice to create a healthy present and future.

## UTILITY COMPLAINT FORM

---

I know as well that APS is trying to charge people extra to opt out. This is unacceptable. Please do not allow APS to charge people extra for trying to maintain their health and safety. That is really unconscionable.

Sincerely,

APS customer  
Sedona, AZ
